11 /**
12 * Runs the operator control code. This function will be started in its own task
13 * with the default priority and stack size whenever the robot is enabled via
14 * the Field Management System or the VEX Competition Switch in the operator
15 * control mode.
16
17 * If no competition control is connected, this function will run immediately
18 * following initialize().
19 *
20 * If the robot is disabled or communications is lost, the
21
   * operator control task will be stopped. Re-enabling the robot will restart the
22
   * task, not resume it from where it left off.
